

303[®] Fabric Guard

303[®] Fabric Guard keeps fabrics fresh, soft, colorful and breathable...all while adding a powerful coating to repel water and prevent the most serious of stains. When applied to clean and dry fabrics, 303[®] Fabric Guard restores lost water and stain repellency to straight-from-the-factory level.s Keep all your favorite fabrics crisp and clean for years to come.

Usage Directions:

Product liquid and spray are flammable, keep product and treated article (until dry) away from heat, sparks or open flames. Do not smoke when applying 303[®] Fabric Guard. Spray until evenly wet, overlapping sprayed areas.

NOTE: Reduced coverage when applied with paint roller or brush. Apply to fabric above 70°F/21°C. (For quicker drying/curing and best results, apply in full sun.) Treated material must be protected from rain/dew until completely cured. CURING: 12-24 hours dependent on temperature. If these steps are performed correctly, the material will be water repellent at this point. 303[®] Fabric Guard will need reapplication depending on fabric exposure to sunlight and weather conditions.

Sq. Ft. Coverage	Example	16 oz.	32 oz.	Gallon
Lightweight Fabric	Polyester/Cotton	75-100 sq. ft.	150-200 sq. ft.	600-800 sq. ft.
